Check if two dates fall on the exact same day

Write a function that takes two date instances as argument. It should return true if they fall on the exact same day. It should return false otherwise.

```
function myFunction(a, b) {  
    return  
}
```

Test Cases:

myFunction(new Date('2000/01/01'), new Date('2000/01/01'))	Expected	true
myFunction(new Date('2000/01/01'), new Date('2000/01/02'))	Expected	false
myFunction(new Date('2001/01/01'), new Date('2000/01/01'))	Expected	false
myFunction(new Date('2000/11/01'), new Date('2000/01/01'))	Expected	false

Run Code

EASY (5/ 21)

Strings

☒ Hello world!

☒ Bug Fix

☒ Bug Fix Final

☒ HTTP to HTTPS

☒ Password Security I.

Numbers

☐ Difference42

☐ Count Odds

☐ Total product

☐ Is 42?

Loops

☐ Easy loop

MEDIUM (0/ 24)

Strings

☐ Hangman

☐ CamelCase

☐ Repeater

☐ First Hello

☐ Palindrome

☐ Prices

☐ Keyboard Error

☐ URL Parameters

☐ Password Security II.

Numbers

☐ Little Child

☐ Binary to Decimal
